

Airbnb Application

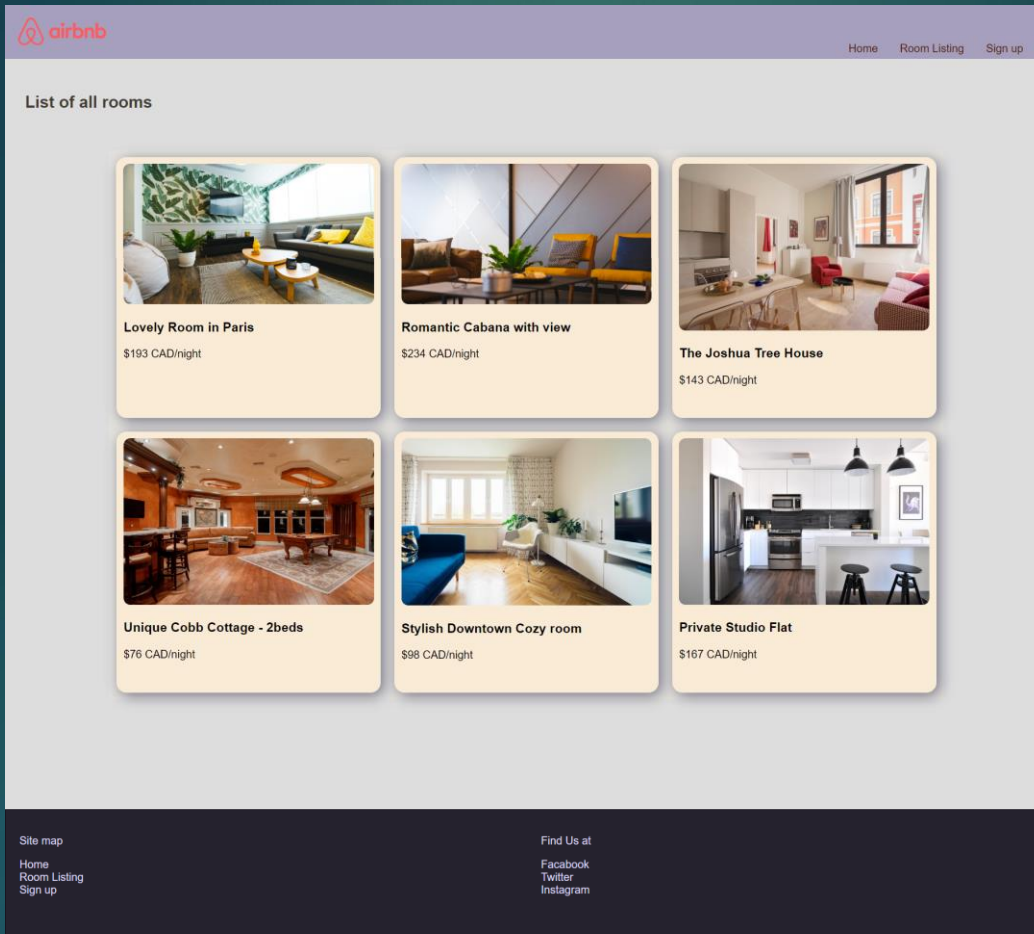

FATEMEH BORHAN

Home Page

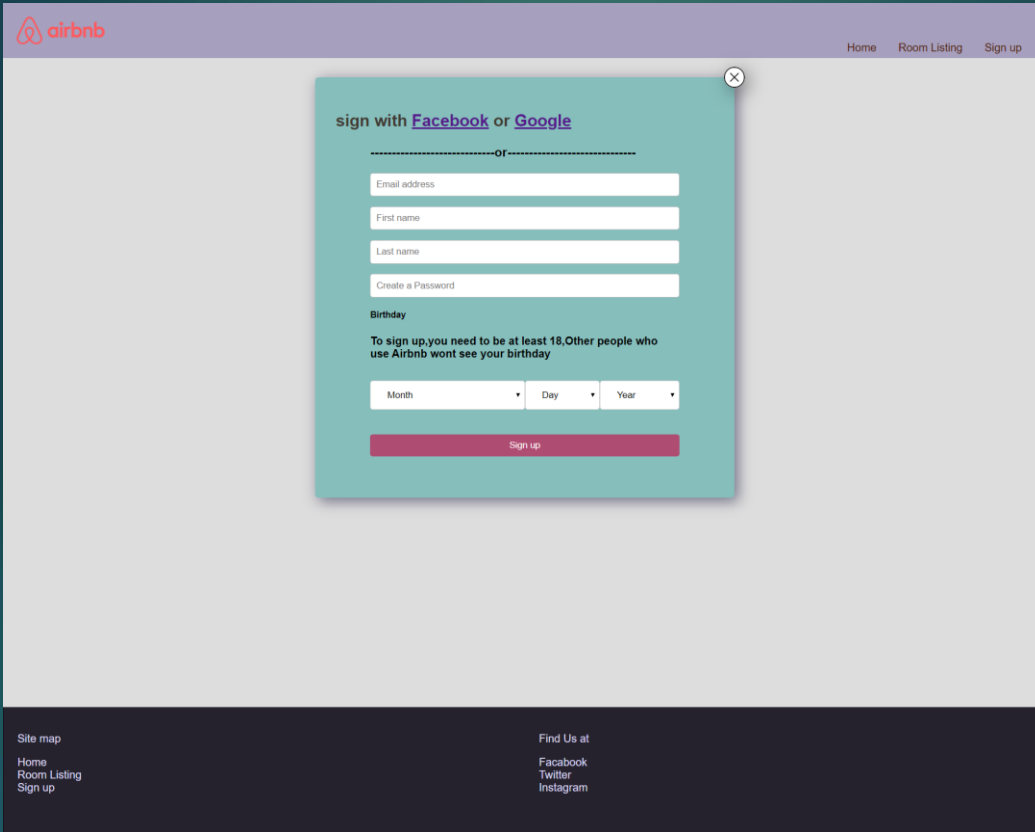

- It has header with a logo and the navigation bar including “home, room listing, and sign up”. All of them works properly and navigate us to the destinations.
- The booking search form is created the same as the given sample, with all details and alignments. I used the date type for check-in and check-out dates.
- Promotion and information sections are also created according to the instruction. A text paragraph and a video are placed in the information section.
- The footer includes the sitemap and the social media links.

Room Listing Page

- Room Listing page shows 6 blocks of rooms, and each block consists of a photo, a title and a price name.
- The header, navigation and footer is created in the main handlebar, so are rendered the same in all our pages.

Registration Page

The image shows a screenshot of the Airbnb registration page. At the top, there is a purple header with the Airbnb logo on the left and navigation links "Home", "Room Listing", and "Sign up" on the right. The main content area is light gray and features a teal-colored registration form. The form has a close button (X) in the top right corner. The form's title is "sign with [Facebook](#) or [Google](#)". Below this is a horizontal separator line. The form contains the following fields: "Email address", "First name", "Last name", and "Create a Password". Below these is a "Birthday" section with the text "To sign up, you need to be at least 18. Other people who use Airbnb won't see your birthday." and three dropdown menus for "Month", "Day", and "Year". At the bottom of the form is a red "Sign up" button. The footer is dark purple and contains links for "Site map", "Home", "Room Listing", "Sign up", "Find Us at", "Facebook", "Twitter", and "Instagram".
